"BIG" on plant health

Improved Color Health and Durability
 Balanced Major and Secondary nutrients

Sugar sources of Micronutrients

Stimulates beneficial Microorganisms

Increases Soil CEC

Improves Physical characteristics of the soil

Chelates Soil Chemistry for availability

Excellent Carbon input and ratio to Nitrogen

Application Guidelines

For use on all Turf, ornamentals, container mediums and Preplants needing Manganese and Potassium correction or long lasting color enhancement

Apply 5-6 lbs. at aerification Twice annually on greens and tees.
 Apply 5-10 on Higher cuts annually or as needed.
 Apply 5-10 lbs in a Pre-Plant prep.
 Apply 1-2 lbs per cubic yard in potting or construction mixes.

NonPlant Food Ingredients:

Humic Acid, Magnetic Rock dust
 Soluble seaweed

Island Bio-greens P.o.
box 6 Shelter Island NY
