**SAFE FOR CHILDREN**  
**AND PETS!**

Formulated for outside use. PCO Choice is a Chemical Free Cedar Oil Solution specially created for Pre or Post treatment of insect infestations. It is formulated at the highest Cedar Oil concentration levels possible for use by Professional Lawn Care Companies and Pest Control Operators. Performs best when applied with a hose end applicator or high volume water delivery systems. It can also be applied with trigger, compression and pressure sprayer applications. It is designed for immediate insect control results when used for OUTSIDE treatments of Residential, Commercial, Industrial, Governmental, Equine and Dairy entities.

PCO CHOICE provides the ultimate in control when applied to turf areas such as sod farms or golf courses experiencing subterranean infestations resulting in damage to the sod. The Cedar Oil and Ethyl Lactate formulation dissolves the insect egg and larvae eliminating the Next Generation of arthropod, while the aromas of Cedar create a barrier of entry making the treated area off limits to any flying or crawling pest. This product can also be used in Misting and Irrigation Systems. Numerous concentrations of PCO CHOICE for various insect conditions can be formulated by the user of PCO Choice from the schedule provided with the container. The product is considered SAFE TO CHILDREN AND PETS and has no effect on beneficial insects such as Lady Bugs, Butterflies and amphibians such as Frogs and Toads. It is classified as a Minimum Risk Pesticide by the EPA. Normal safety precautions should be practiced when using this product.

**US 1 Gallon**

# PCO CHOICE

PCO Choice is a contact killer as well as a pheromone interruption agent. It is also a penetrant and will erode the insect egg and larvae by promoting de-hydration.

Cedar oil is a natural essential oil that provides a pheromone interruption agent that impairs the insects mental capacity. When combined with Ethyl Lactate, a corn oil by-product, it becomes a bio solvent which is instrumental in triggering instant erosion and dehydration of the insects exoskeleton and, subsequently, the egg and larvae. For every insect you see there are 99 more in egg and larvae stage. Exposure to a water solution spiked with cedar oil and ethyl lactate will destroy the egg and larvae stage, breaking the egg layer cycle and eliminating the next generation of insects.

**APPLICATION:** PCO CHOICE is best applied with a hose end applicator cup. You can also use a hand held Atomizer (sprayer), preferably air compression in design. For large outdoor areas, a truck mounted sprayer may be easily used. Spray outdoor areas beginning with the buildings and working outward. For indoor application, use of a mister is recommended, along with the Regular Treatment mixture below. Warm/hot water will bring optimal results, but is not required.

**RECOMMENDED MIXTURES:** Contact Southwestern Cedar Oil for additional mixtures (see below)  
Up to 64oz. PCO Choice to 100 Gallons Water - For agricultural needs such as fruit trees and crops  
4oz. PCO Choice to 1 Gallon Water - Regular/Maintenance Treatments

**PRECAUTIONARY STATEMENTS:** Caution - We recommend good safety practices when using any pest control products. Avoid contact with eyes and skin and keep out of reach of children. If product gets in eyes, flush out with water for at least 15 minutes. If on skin, wash with soap and water. If irritation persists, call physician. Physical Hazards: Keep away from heat and open flames. Do not incinerate container and should be disposed with regular sanitation materials. Temperatures of over 130 degrees Fahrenheit can cause container to burst.

**STORAGE/DISPOSAL:** Keep out of reach of children. Store in cool, dry area, away from direct sunlight. Store in cool dry place away from open heat and flame. When container is empty, it can be disposed in trash.

**LIMITATION OF LIABILITY:** Buyer assumes all responsibility for safety and use not in accordance with label, directions and precautionary statement. Southwestern Cedar Oil offers this product as a minimum risk pest control product and qualifies for exemption from EPA registration under the Federal Insecticide Fungicide and Rodenticide Act.

**INGREDIENTS:** 90% CEDAR OIL • 10% POLYSORBATE
