Odor & Solids Control in Wash Pits & Drainage Area

Non-Plant Food Ingredients:	
Microorganisms:	<1%
Naturally occurring bacteria, algae, protozoa and microbial by-products.	
Inert Ingredients:99%
Water-based culture medium	

Recommendations for use:

Initial application: One (1) gallon SuperBio® PitBoss™ for each 200 gallons of holding tank capacity.

Maintenance: Typically one-half (1/2) gallon SuperBio® PitBoss™ every two (2) weeks. For drainage areas mix ½ gallon with rinse water every two weeks.

Problem Systems:

Initial application: Two (2) gallons at first application, after two (2) weeks add additional two (2) gallons of SuperBio® PitBoss™.

For slow infiltration in drainage area: Apply 1 gallon to the distribution box (if applicable) followed by flushing with an adequate amount of water to move SuperBio® PitBoss™ into the drain lines. Then follow one (1) week later with the above rates applied to the holding or septic tank.

Maintenance: Typically one (1) gallon SuperBio® PitBoss™ every two (2) weeks.

Optimum storage conditions: Dark fiberglass or plastic containers in cool, dry place not exposing contents to sun/UV light.

CAUTION: Use only as directed. Do not take internally.
