

## Product Description

- ▣ ALL NATURAL is an economical non-ionic wetting agent, derived from naturally occurring saponins found in coconut oil.
- ▣ There is no alcohol in the product. It is non-toxic and non-corrosive
- ▣ ALL NATURAL works by modifying the surface tension which enables the water to pass into the soil structure.
- ▣ It can be used on any area that has a water infiltration problem
- ▣ ALL NATURAL has no toxic effect on the soil, and in fact, the base material found in ALL NATURAL can be utilized as a food source by soil microbes
- ▣ ALL NATURAL can be used in tank-mix combinations of fertilizers, fungicides and herbicides to improve the actions of the chemicals. *It is safe to use with bio-stimulants*

### Principal Functioning Agents

Modified cocodiethanolamide ..... 90.0%  
 Constituents ineffective as adjuvant..... 10.0%  
 Ingredients are exempt from the requirements of a tolerance by the Federal Code of Regulations, title 40, part181.001

## General Use Guide

<b>Golf Course Greens &amp; Tees Preventative/Curative Application</b>	<ul style="list-style-type: none"> <li>▣ Apply 8.0 to 12.0 fluid ounces in 5 to 10 gallons of water per 1000 sq. ft.</li> <li>▣ Follow application with sufficient irrigation to move product well into the root zone</li> <li>▣ Repeat application in 10 to 14 days</li> </ul>
<b>Golf Course Greens &amp; Tees Normal Maintenance</b>	<ul style="list-style-type: none"> <li>▣ Apply 4.0 to 6.0 fluid ounces per 1000 sq. ft. every two to four weeks in combination with your regular chemical and fertilizer program</li> </ul>
<b>Golf Course Fairways Professional Lawn Care Athletic Fields Sod Installation</b>	<ul style="list-style-type: none"> <li>▣ Apply at the rate of 1.0 to 1.5 gallons per acre</li> <li>▣ Repeat every 8 to 12 weeks during the growing season</li> </ul>
<b>Spreader / Activator</b>	<ul style="list-style-type: none"> <li>▣ Apply at 2.0 to 4.0 fluid ounces per 100 gallons of spray mixture</li> <li>▣ In difficult wetting situations such as hard water, or mature waxy foliage, use a rate of 4.0 to 6.0 fluid ounces per 100 gallons of spray mixture</li> </ul>
<b>Application Instructions</b>	<p>In tank mix combinations to reduce the chance of excess foaming, <b>ALL NATURAL</b> should be added to the tank last.</p> <p>If <b>ALL NATURAL</b> is used to assist in the wetting of powders or as a compatibility agent, it should be added before the rest of the ingredients.</p> <p>In most instances, the use of <b>ALL NATURAL</b> in combination with herbicides, fungicides, pesticides and fertilizers improves the compatibility of tank-mix combinations. Prior to combining into a tank mix, always perform a compatibility check by mixing a small amount of each product together in water. Allow to stand and check for separation.</p> <p>Foliar applications are best applied when the air is still and temperatures are below 85 degrees. When applied in extreme heat, product should be watered in immediately after application.</p>
